

Polyester Spun Yarn – Virgin & Recycled Grades

At **Kiran Spinning Mill**, we offer premium **Polyester Spun Yarn** available in both **Virgin** and **Recycled (rPET)** grades. Our yarns are manufactured using **Ring Spun**, **MVS (Murata Vortex Spun)**, and **Siro Compact** spinning technologies, ensuring superior quality, strength, and performance for various textile applications.

Virgin Polyester Spun Yarn

Made from high-quality virgin PET fibers, our virgin polyester spun yarn is ideal for high-performance textile requirements where consistency and durability are essential.

Available in:

- **Ring Spun Yarn** – Traditional method for strength and versatility
- **MVS (Vortex Spun Yarn)** – Ideal for low-pilling, high-speed knitting
- **Siro Compact Yarn** – Enhanced strength, less hairiness, smoother finish

Key Features:

- Excellent color fastness & dye absorption
- Uniform strength and low elongation
- Available in raw white and dyed shades
- Wide count range (as per requirement)

Applications:

Knitting & weaving, shirting, suiting, sewing thread, uniforms, home furnishings

Recycled Polyester Spun Yarn (rPET)

Our rPET yarn is made from 100% recycled PET bottles and polyester waste, offering a **sustainable solution** without compromising quality.

Spinning Types Available:

- Ring Spun
- MVS
- Siro Compact

Key Features:

- Eco-friendly & GRS-compliant production
- Comparable strength to virgin yarn
- Cost-effective and reliable quality
- Available in raw white and dope-dyed colors

Applications:

Sustainable fashion, home textiles, bags, institutional and eco-conscious products

All our yarns undergo strict quality checks and are customizable based on client needs. Whether you're looking for performance or sustainability — **Kiran Spinning Mill delivers excellence in every strand.**
